

Features:

Magnetic Pump 15R,

1/2"NPT thread

With Stainless Steel 304 Head

Food Grade High Temperature Resisting Magnetic Drive Pump

Heating Resisting 140 Celsius Degree (32°F-284°F)

Barb Ending are available

Max Capacity: 16/19 L/min

Rated Capacity: 8/12 L/min

Max Head :2.7/3.4 Meter

Rated Head:1.5 Meter

Warm Tiips: (magnetic pump precautions)

1. The magnetic pump is forbidden to empty the transport (the pump is closed when the outlet valve is closed).

2. If the pump is running, it must be stopped within 1 minute.

(Gas into the pump head caused by the page idle water flow water shortage)

4. Magnetic pump recommended continuous operation; often on / off the opportunity to greatly reduce the pump life.

5. Pump extraction medium temperature changes should be controlled within 100 °C, high temperature does not exceed 130 degrees

Excessive temperature rise / fall may cause damage to pump parts (eg shafts, bearings).

6. If the pump is suddenly powered off, the power must be switched off immediately and the outlet gate valve closed.
