Información técnica

Cuerpo en acero especial. Punta de carburo de tungsteno. Temple total en el cuerpo. Acabado jateado. Encastre SDS Plus. Estas herramientas de impacto tienen dureza diferenciada en el hilo de corte y en la base que será golpeada. Las herramientas son sometidas a testes de aplicación para garantizar su resistencia mecánica durante el uso constante. Se utiliza la herramienta para perforación de piedras, cemento y ladrillos utilizando un martillo perforador/rompedor. Las herramientas son producidas y testadas bajo normas específicas.

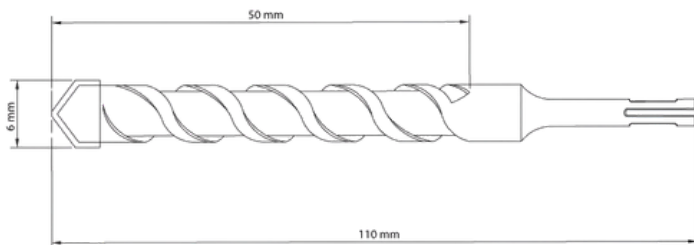

Recomendaciones de uso

Use siempre gafas, guantes y otros materiales de seguridad de acuerdo a la tarea a realizar. Mantener la broca fuera del alcance de los niños. Cuidar con la lámina de corte pues puede hacerle daños. Almacenar en un lugar limpio y seco.
