Información técnica

Lámina bi-metálica. Dientes en acero rápido HSS. Temple total en el cuerpo. Pintura electrostática. Dientes trabados. Rosquilla 1/2" - 20G. Las herramientas son sometidas a testes de aplicación para garantizar su resistencia mecánica durante el uso constante. Se utiliza para la perforación en hojas metálicas finas, tubos, perfiles en aluminio, PVC y madera. Las herramientas son producidas y testadas bajo normas específicas.

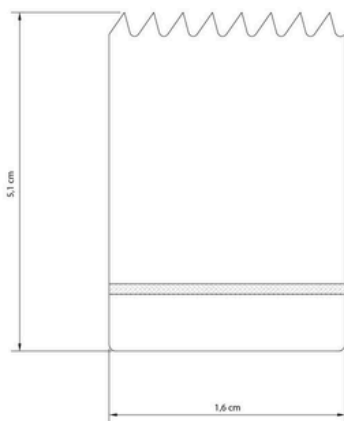

Recomendaciones de uso

Siempre use gafas y guantes de seguridad, tapones para los oídos, mascarilla contra el polvo y ropa de protección adecuada de acuerdo a la tarea a realizar. Mantener herramientas de corte lejos del alcance de los niños. Cuidar con la lámina de corte pues puede hacerle daños. No exceda la velocidad máxima indicada para cada tamaño de sierra copa. Lubrique la herramienta siempre que es posible durante el corte. Almacenar en un lugar limpio y seco.
