

GT-1D

Audio Tenant Station

The GT-1D audio tenant station is used to answer incoming calls, unlock the entrance, call the guard station(s), and trigger an optional output.

The guard station button calls any GT-MKB-N connected in the system. If a pull cord or panic call button are integrated, the GT-1D will emit an emergency tone when activated.

Communication is simultaneous via the handset. Up to four GT-1D tenant stations can be used in the same suite or apartment.

- **Handset communication**
- **Unlocks the entrance where the station is in communication**
- **Can call the video guard station**
- **Call tone volume control**

Power Source 24V DC—supplied by GT-BC

Communication Handset (full-duplex)

Mounting Surface wall mount

Wire Type 2-cond., solid, non-shielded, PE insulation—use Aiphone #872002

Weight ≈ 0.73 lbs (330 g)
